2421 S. LOWE AVE

MAIN Fire Alarm Office
Room 607 - City Hall

Handling all fire traffic north of Pershing Road and north to Howard St, this office is the nerve center to all companies within that area. At present this office is participating in notifying over two-thirds of over the one-hundred thousand alarms per year received. In addition and also very busy is the ENGLEWOOD Office, - at Wentworth Ave & 64 TH St, in Englewood, which is a right-arm to the downtown office. The present joker system we use here in the CFD was introduced in 1878, followed in 1927, by the still popular, and rapid amplifier system used to notify companies direct of an alarm in their perspective districts. One of the largest conflagrations handled here was the 105 Engine, 1934 U.S. Yards Fire
